Education

Birla Institute of Technology and Science *BE in Computer Science* *Aug 2019 – May 2023*
◦ **Relevant Courses:** Data Structures and Algorithms , Computer Networks, Object-Oriented Programming, Operating System , Database Management System

Experience

Mindgate Solutions *Chennai, India*
Software Developer *Jul 2023 - Present*

- **Technologies Used:** Java, Spring Boot, SQL, Oracle, Postgres, Redis, Kafka, Jenkins
- Architected and scaled the Corporate Onboarding Platform, a core product serving **1000+** enterprise clients, ensuring high availability and fault tolerance across multiple banking partners.
- Re-engineered legacy monolithic APIs into distributed microservices with parallelized request handling, improving onboarding **throughput by 30%** and enabling horizontal scalability under heavy load.
- Built a configurable pricing engine (Charges Module) supporting dynamic rule evaluation, effective-dated pricing, and multi-tiered client logic, increasing product flexibility and reducing customization overhead.
- Engineered the onboarding module to seamlessly process data inputs from multiple integration modes — RESTful APIs, MQs, or batch file uploads — ensuring consistent behavior and data integrity irrespective of the source system.

Zeotap India Pvt. Ltd. *Bengaluru, India*
Software Engineer Intern *Jun 2022 – Dec 2022*

- Contributed to the Customer Data Platform (CDP) by developing and enhancing backend services using **Java, ScyllaDB, PostgreSQL, RabbitMQ, and Spark**.
- Improved platform functionality by adding **asynchronous execution**, and introducing new **ID resolution strategies** to optimize data processing that reduces erroneous mappings by **30%**.
- Designed and produced **15+ backend features and 5+ RESTful APIs** for features such as calculated attributes, last refresh tracking, and identity resolution.
- Gained hands-on experience with **Docker, Google Cloud (GCS, Data Fusion), and BigQuery**, while working in an **Agile/Scrum** environment using Jira.

Projects

Distributed Book Review & Recommendation Platform [project](#) 

- Built **microservices architecture** (User, Book, Review, Recommendation) with **API Gateway + JWT authentication**. Enabled real-time updates using **Kafka** for asynchronous review → rating sync.
- Introduced **Redis** distributed caching for quick personalized recommendations in multiple pods.
- Containerized services with **Docker Compose**, using multi-schema **PostgreSQL** per service for scalability.

Job Application Portal [project](#) 

- Developed a full-stack job portal where users can register themselves as recruiter or applicant, recruiters can post jobs, view resume, and review applications, while applicants can apply with a resume.
- Resolved user authentication and authorization using **JWT and role-based access control**.
- **Tech Stack:** React, Spring Boot, REST APIs, JWT, Postgres, Axios

Technical Skills

Backend: : Java, Spring Boot, Spring MVC, Microservices, Hibernate, Kafka , Redis

Frontend: : Javascript, ReactJs, HTML/CSS

Databases: : PostgreSQL, Oracle, MongoDB, Cassandra

CI/CD: : Git, Jenkins, Docker, Kubernetes, CircleCI, Harness

Other Skills: Data Structures, Algorithms, Design Patterns, System Design(LLD)
